

# JANANI POWER ENGINEERING

## SOLAR POWER SOLUTIONS

## ECO-FRIENDLY ENERGY RESOURCE

### PROFILE

Janani Power Engineering started the endeavour to resource the nature's power - Solar Energy with installation of solar-based products for domestic and commercial applications. Within a short span of 3 years, Janani Power Engineering has gained a well revered name in the domain of Solar Energy Solutions. We are one of the leading Provider of solar solutions by identifying the advanced technological solar products and equipments with our strong market research team. Janani Power Engineering has always been with the mission of introducing and supporting the use of solar energy with the delivery of superior quality solar products. Janani Power Engineering has planned to introduce various Utility of Solar Energy in the imminent future with an aim to promote "SOLAR SOURCE AS FUTURE RESOURCE".

## OUR PRODUCTS

### SOLAR WATER HEATER - ETC

#### Features

- Green Energy, No Pollution, Eco-friendly
- Design to perform in all seasons and all regions
- Compact puff injection technique for better heat reiteration
- Maintenance-free, Zero-running cost
- Pressurized and heat exchange models also available

#### Applications

Homes, Schools, Colleges, Hospitals, Industries, Hotels, Restaurants, Apartments

### SOLAR WATER HEATER - EPC

### SOLAR ROOF TOP POWER PLANT

#### Features

- Uninterrupted power for 24 hours
- One time investment, lifetime free power
- Green Energy, No Pollution, Eco-friendly
- Power for any location
- Starting range from 1 Kw to 100 Kw

#### Applications

Homes, Schools, Colleges, Hospitals, Industries, Hotels, Restaurants, Apartments

### SOLAR STREET LIGHTS

#### Features

- Power LEDs for high brightness and low power consumption
- Auto dust to dawn function
- Suitable for all areas
- Green Energy, No Pollution, Eco-friendly
- Weather-proof luminaries and battery box with locking provision

#### Applications

Homes, Schools, Colleges, Hostels, Industries, Restaurants, Resorts

### SOLAR FENCING

#### Features

- Easy Construction
- Power fence can be erected to target Species only
- Low maintenance
- Long lasting because of minimal physical pressure
- All domestic and wild animals can be controlled economically
- Makes strip grazing and back fencing easy
- Not harmful. It gives a short, sharp but safe shock to the intruder

#### Applications

Schools, Hotels, Resorts, Colleges, Hostels, Agricultures, Farms etc.,

### SOLAR WATER PUMP

#### Features

- Efficient use of Solar Power Monitor
- Pressure Cut-off system
- Current Overload Protection
- Thermal Overload Protection
- Dry run Protection
- Low Power Protection

#### Applications

Farming, Flood and Drip Irrigation, Cattle Watering, Community water Supply.

### SOLAR POWER PACK

#### Features

- Green Energy, No Pollution, Eco-friendly
- Suitable for Lighting, Fan and TV load
- Highly efficient and zero tuning cost
- Uninterrupted power to home, EB not required
- Starting range from 200wp to 800wp

#### Applications

Homes and Small Commercial Shops

### SOLAR HYBRID SYSTEMS

#### Features

- Dual Charging options solar as well as utility
- Pure sine wave output.
- Protect the battery from over charging and under charging
- No need of separate UPS for computers

#### Applications

Homes and Small Commercial Shops

### CERTIFICATION

Distributor : MAS Solar Systems Private Limited
